Draft Variation to Moree and Remote LAPs
Broadcast Planning Section
National Allocations and Licensing Branch
Australian Communications and Media Authority
PO Box 78
BELCONNEN ACT 2616

Dear Sir/Madam

Re: ACMA 2009/2160 (Remote LAP)

Gin Gin has a population of approximately 1000 in the township, with a large residential rural community.
Because of the popularity of our community radio, we have had requests from the entire region to service a larger area.
As we have had transmitter difficulties, we have been limited and we now have access to a 150W transmitter, to enable us to better cover a larger area which will attract both listeners and sponsors.
Our current broadcasting power is licensed to 100 W, and we would anticipate an increase to 150 W, to better serve our purpose.
There is no other instant communication for our region and the commercial broadcasters are unable to reach all areas.
We, at this time cover approximately a 10 km radius and would in the future look to increase this coverage area to approximately a 40 km radius to include other small communities such as Wallaville, Stt Kolan, Sharon and Booyal.
We are a 'not for profit' association and any funding generated is put back into our community.
Thanking You

Di Andersen
Secretary
