To Australian Communication and Media Authority,

Interweave Arts is a Launceston-based association that aims to promote arts, education, culture and community, with a particular emphasis on youth and disability projects. Through support from the Launceston City Council, Interweave is currently sited at the Studio Inveresk Cultural Precinct.

We are writing to support World Music Radio’s application to establish a community-based radio station in Launceston with specific emphasis on world music and locally written and performed plays and musical works.

As a successful arts organisation in Northern Tasmania, we support their aim of offering skills opportunities the WMR station will be able to offer those in our community interested in pursuing a career in broadcasting, as well as broad exposure for our local artists, actors, writers, musicians and composers.

We wish WMR all the best with their application and look forward to Launceston being provided with the opportunity to hear music from popular and folk music from around the world, particularly from the areas from which our population springs.

 Regards,

Kim Schneiders
