Draft LAP Variation - Rural Central & Eastern Australia Radio

Rebel Radio Network is the licensee for commercial radio services 4RBL and 4BRZ. I refer to the ACMA’s draft LAP variation and explanatory paper.

We generally agree with ACMA’s proposed variations for 4RBL/4BRZ. There are a few minor clarifications;

Chinchilla

4BRZ is correctly listed as a maximum antenna height of 50m. The 4RBL specification needs changing to also reflect a maximum antenna height of 50m.

Weipa and Kilcoy

These services will operate with vertical polarisation.

Regards

Aaron Jowitt
